Quick Reference Product Guide

This product guide has been designed **to help dealers quickly locate the products** they are looking for and to help provide the best possible solutions for their customers. More detailed information including **installation instructions, product warranties, shop drawings** and color pictures can be found in the full line catalog and also at the website www.arndtandherman.com.

This product guide is **available in .PDF format** by section or in whole on our website.

Sections are **arranged by product category** and further organized by size, style, shape, etc. To make ordering easier, we have placed all the pertinent ordering information in easy to read charts.

All item numbers are shown to help users get comfortable with ECMD **Link** (desktop order entry and inquiry program) and ECMD **Gears** (iPhone® and Android® app for customers – order entry, pricing and inquiry). Both of these technology platforms allow customers to search using their own item numbers and include images or drawings of every item. Just ask your Territory Manager to help get you started on either ECMD **Link** or ECMD **Gears**. (see pages 111-112)

Our customer service team is always available to help with any questions simply by calling (toll free) 866-204-3139. They will be eager to help with pricing, sizes, installation tips, takeoffs, templates, availability, delivery dates, warranties, best practices and just about anything else thrown their way.

Regional Availability

Each item in the catalog is marked with a regional code **indicating the regional availability**.

(SE) Southeast Region

(TX) Texas Region

Customer Service Hours:

Region	Order Entry Cutoff	Customer Service Hours
Southeast	5:00 PM EST	8:00 AM – 5:00 PM EST
Texas	5:00 PM CST / 6:00 EST	7:00 AM – 5:00 PM CST

Our Customer Service Team & Promise

Our goal is to make ordering building products easy for you whether it's via phone, fax, email, **ECMDGears**, EDI, or **ECMDLink**. Our call center is equipped with TV monitors connected to the phone system so we know when there is a surge in call activity allowing us to handle your call more efficiently. Our Customer Service Team has over 100 years of experience. Their unsurpassed product knowledge helps them provide detailed product specifications, custom quotes and shop drawings.

To help your operations run more efficiently, we'll do the following:

- Automatically fax or email your acknowledgement when the order is entered.
- Confirm the delivery date when the order is placed.
- Include your item numbers on all paperwork including acknowledgments, shipping manifests, packing slips and invoices making it easier to receive and process in your payables system.
- Scan every product's bar code to help eliminate picking failures on your order.
- Combine these shipments with moulding and stair part orders placed with our sister companies (EastCoast Mouldings, Crown Heritage Stairs and ECMD Distribution) giving you one delivery encompassing a broad assortment of products.
- ASN (Advance Ship Notice) Our system automatically sends a FAX or email during the night so you know when to expect our truck to arrive and which orders are delivering.
- Deliver your order on a curtain-side delivery truck for easy forklift unloading and to minimize soil and damage.
- Automatic Bulk Pricing automatically applies discounts for larger orders of many items.
- Resolve billing discrepancies at delivery time and handle these exceptions before the invoice process.
- Review orders for inconsistencies of size, color or style and assist with blueprint takeoffs.

What is Gear**Scan**?

Notice the use of a special Gears**Scan** barcode on the top of most pages in this catalog. We'll also be adding these unique barcodes to literature, displays and samples.

Users of our **ECMDGears** mobility app will be able to scan this code and get a real time display of the items associated with that page of a catalog or part of a display or sample – showing the dealer's price without requiring each item to be selected individually.

ECMDGears users can view the availability of those related items and easily convert it into an order.

See Pages 111-112 for more info on technology apps.

Round Tapered - DuraStone

Unfluted DuraStone - Sand Color

Never needs paint - colored throughout - natural rustic stone finish

DuraStone™ columns are maintenance-free fiberglass columns constructed by combining marble dust with fiberglass and color, and treated with a unique, patent-pending process to create a natural, rustic finish that looks and feels like real stone.

Stocked in two popular colors – Sand and Ivory.

Also available in square and round non-tapered on made-to-order basis.

2" - Cladding Components - sold 4 pcs per bag

SE	TX	Description	Item No. - White	Item No. - Beige
SE		Screen Base 2" x 9'	60BASE2WH	
SE		Screen Cap 2" X 9'	60CAP2WH	
SE		Screen Clad 2" x 9'	60CLAD2WH	

Step 1	Step 2	Step 3	Step 4
			
Install the vertical components around each post.	Install the horizontal components around all 2 x 4 railings.	Cut and install each screen panel.	Install outside face components to finish.
Simply measure and install all vertical components on each post. All four sides of the post will be covered.	Measure and cut each component to fit snugly around each 2x4. Attach screen base to outside face.	Cut each screen panel to appropriate size and roll in spline to tighten and secure the screen.	After all screen is securely attached, simply cut and install the outside face components to finish the installation.

04 - Vinyl Railing Systems

Screen Porch Cladding Profiles

Designed for use on 4x4s, 2x4s, 6x6s and 2x6s framed construction.

All three pieces Cap, Base and Cladding come in 2", 4" and 6" sizes.

Screen Cap – Once the screen has been installed and splined into a screen base, the cap is tapped into place to secure the screen. (Suggest .175 diameter spline for typical fiberglass mesh).

Screen Base – Use only on the outboard face of an inline post or on the two outboard faces of a corner post. Screen Cap secures screen into this piece.

Screen Clad – Use as general cladding on all faces of post that don't use a screen base.

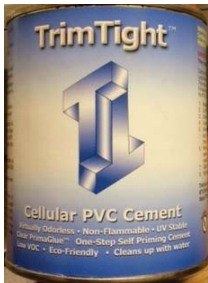

05 - PVC Glue and Filler

- **Trim Tight PVC Cement**
- Cleans up with water
- Extra strong holding power PVC to PVC
- DOT non flammable – easy to mail or UPS
- No need for primers
- Green – LEED points available
- Full case only 10 – 8 oz. cans
- Full case only 6 – 16 oz. cans
- **Bond&Full PVC Glue**
- Eco friendly
- No need for gun or applicator
- Great for PVC moulding or boards
- Fills cracks and holes
- Is sandable and paintable
- 12 tubes per case – full case only
- Tube container extends life of the glue

TrimTight Cellular PVC Cement

Two convenient sizes - brush in can - dries quickly - continues to cure

Bond & Fill

Glue + filler putty and sandable - quick setting

SE	TX	Item No.	Description	Weight (lbs.)
SE		BFCASE7OZ	Case Quick+Easy 12 - 7.1 oz. tubes	9

06 - KnotWood(R) PVC Mouldings

- Highest quality cellular PVC extruded profiles
- Cuts and nails better than wood
- Moisture-proof and termite-proof
- Will not rot or decay like most woods
- Bundles wrapped Poly or boxes
- Manufactured by Vi-Lux® Building Products
- 25 year Limited Warranty
- 37 different profiles
- Superior nailing and gluing
- Saves time and energy
- Does not promote mold and mildew
- Fine for kitchens and baths
- Known for exterior use
- See glue products in Section 5

08 - ProFlex Flexible Mouldings

- Advanced polymer composite
- Quick ship from large inventory
- Made to order – custom sizes and shapes – call for help
- Made to your template
- Limited lifetime warranty
- High strength – maximum flexibility
- Perfect for interior or exterior use
- Preformed and straight pieces
- Machines and cuts like wood

09 - Attic Stairs

- Fully assembled - ready to install
- Full width piano hinge
- 3/16" ladder rods under treads
- 350 lb. models have heavy duty springs and double hinges
- Good, better and best models
- 32 model/size choices in stock
- Long lasting zinc plated hinges
- Finished millwork appearance
- Easy installation instructions
- Eased edges on handrails
- Fireguard and Thermogard options
- Wood and aluminum models
- New R-10 models now available

Model Options	Description of Option
F	"Fireguard" – The fire retardant plywood door panel is chemically treated to provide slower ignition, low flame spread, and lower smoke production. Treated plywood has a flame spread index of 25 or less in 30 minute test.
T	"Thermogard" – Added inside plywood panel door is a 3/4" thick glass isocyanurate foam plastic sandwiched between 1.5 mil. foil facers, having an R value (aged) of 6.
W	Factory installed bulb type weather-stripping inserted into machined kerfs seals the frame opening and the door panel.
FT	Fire and Thermo combined
TW	Thermo + Weatherstripping combined

30" x 60"	10'3"	65"	77"

10 - JamSill Guard

10 - JamSill Guard

- Reduces water damage call backs
- Quick, simple, adjustable installation
- Sloped weep areas channel out moisture
- Multiple piece design
- Ideal for doors and windows
- Lightweight – ask about UPS shipping
- Accommodates most rough openings
- Available in 8 depths to fit a wide variety of applications
- Quick Ship

Single Packs are packaged individually with complete sill pan, PVC glue, applicator brush and installation instructions.

Bulk Packs are shipped in bulk, nested together. Installer provides PVC glue.

11 - Flamedxx

Distributor of Flamedxx®

- Flamedxx Fire Retardant OSB
- IAPMO ER 0173 code evaluation report
- Class A rating on both 10 and 30 minute ASTM E-84 tests – coated 1 side
- Meets ASTM E119 – coated 2 sides for 2 hour wall assembly and to date no FRT plywood has been able to achieve this
- Common sizes - 7/16", 19/32" 23/32"SE and 23/32" T&G
- Call office for quotes for 2 sided coated applications for 2 hour wall assembly
- PS 2-04 structural rating
- Orange tint to identify product
- All the advantages of OSB over plywood
- Used in homes, schools, hospitals, apartments and condos
- NY City Bldg. Dept. MEA# 628-06-M
- Flame Spread Index – 10
- Smoke Developed Index – 110
- Use for roof sheathing, wall sheathing, subfloors and single layer floors
- Complies with 2009 & 2012 IBC
- Complies with 2009 & 2012 IRC
- 4x9 sheets – call for special pricing

Cabinet Screws

Cabinet screws are designed for use in cabinet construction and installation. The screws are thin enough to prevent most material splitting while providing sufficient strength to guarantee a secure installation. The washer head design presses flush against any cabinet surface. Cabinet screws are self-tapping, have the w-cut thread design, are Climatek coated and are ideal for vinyl siding in addition to cabinets.

Kameleon

Composite Deck Screws

Kameleon composite deck screws have fiber-trapping rings, W-cut thread design, Zip-tip, CEE threads and are Climatek coated. The under-head has saw-blade like cutting teeth that cut a perfectly clean hole into the decking. The CEE thread feature enlarges the screw hole allowing the composite decking to settle easily and increases the screws drawing strength and reduces friction on the shank which can result in lowering the driving torque.

R4

Multi-purpose

Climatek

R4 is a multi-purpose screw that is self-tapping, has a countersink head, W-Cut thread design, CEE Thread, Zip-Tip and is Climatek coated. For use in wood, particle board, cement fiberboard, plastic, sheet metal, etc. The under head design allows for countersinking into even the most brittle surfaces. The screw head closes the hole off with precision, leaving no damaged fibers around the head.

Vinyl Window Screw

Jamb Adjustment Screw

Climatek

Vinyl window screws have a patented Washer Head Design, W-Cut thread design and are Climatek coated. The special edge under the screw head captures the vinyl wall material at penetration time. After drilling a larger "working hole", the screw "hooks onto" the inner wall allowing adjustment in and out from the wood frame or rough opening.

RSS

Structural

Climatek

RSS screws are made of especially hardened steel to provide you with high tensile, torque and shear strength. The sharp threads and points bite instantly into the material (including hardwood), reducing the splitting effect due to smaller shanks. The #30 star drive will deliver approximately 650 lbs. of energy, eliminating the need to drill a pilot hole as with most types of lag screws.

Trim

Finish

Climatek

Trim Head screws are an excellent choice for most fine carpentry applications as well as window extension jambs. These screws have the smallest screw head available and come in sizes from 1-1/4" to 5" in length. Pre-drilling is only necessary if the building material's limitations require a pilot hole to be drilled, as in hardwoods like Mahogany, Ipe, etc. The Reverse Thread feature is found on screws from 2" to 3-1/8" in length.

Notes – Technology
Now Available on Androids in addition to iPhones

OUR WIRELESS APP IS FREE

We named our mobile app **ECMDGears** to symbolize the reliability and efficiency of a choreographed supply chain that operates in the manner of smoothly meshed **Gears**.

ECMDGears extends our supply chain right to the palm of your hand—whether you're in the office or on a job-site. **ECMDGears** is much more than “just another app”. It provides real-time access to your account, acting as a full-function portal to our system. You'll appreciate the intuitive user features that make it easy to learn and really fast to use. Among the functions you'll appreciate:

- Look up your open orders to see their status—whether they've been sent to be picked in our DC, loaded on a truck, or out for delivery.
- Access your PO history to review past orders.
- Get the price and availability of any item—not just a price, but your actual price just as if you called your Territory Manager or our CSR for the price. Quantity discounts are even applied automatically.
- Place an order using **ECMDGears** easy-to-use product search feature, or using your own item numbers! And, get the actual delivery date.
- View a picture and specifications of each item.

The goal of our software development team was to make **ECMDGears** so intuitive you can easily use it on your First try, and to make it quicker than making a phone call. You'll find **ECMDGears** isn't just a high-tech gimmick—it is a real work tool.

If you're already authorized to access your account via ECMDGears, use it to check your cost on every item before you buy it elsewhere! If you're not yet a Gears user, have your ECMD TM sign you up today!

MORE ABOUT
ECMDGears

Notes – Technology Now available for Androids as well as iPhones!

ECMD's On-Line Tools Save Time & Money

ECMDLink is a web-based, full-function portal that gives our dealers access to their individual account in our ERP system. It is available for use on any desk-top or lap-top computer having an internet connection and facilitates order entry and broad inquiry functions.

ECMDGears provides wireless mobile connection to your account via iPhone or iPad. The Gears app is downloaded in secure manner from the Apple App Store. Similar to Link, Gears provides real-time connectivity to the customer's individual account in our ERP system and has unusually rich inquiry and order entry functionality for a mobile device.

THE ECMDLink USER INTERFACE IS DESIGNED FOR EASY USE ON DEVICES HAVING A KEYBOARD, DESKTOP OR LAPTOP PCs.

CONVENIENCE & EFFICIENCY: Both are unusually dynamic systems that provide reliable information and transaction capabilities specifically tuned to YOUR account. Instead of a generic "system" price, your inquiries and orders receive YOUR pricing. Even the quantity discounts are automatically applied. Their "real time" functionality provides the same product availability and delivery commitment you receive if you call our customer service office. The bottom line is that **ECMDLink** and **ECMDGears** are convenient time-saving tools that let a few key-strokes (using your own item numbers or the built-in item search feature) to initiate an order and delivery exactly the way it would have worked if you had called or FAXed it to our office. And, both systems are available around the clock.

SECURITY: It is important to point out that both systems are far more than just another icon on your desktop or iPhone—in effect both become a secure terminal providing deep access to your private company data. Accordingly, we have built in appropriate technical security measures and rigorous authorization and set-up protocol in order to protect your confidential business information. An important part of that regimen is that each user can connect only via a single email address, and a single email address can be associated with only one computer and one iPhone or iPad.

The business owner or top manager who authorizes the access will receive an automated email monthly that lists the email addresses he has approved for access to his business account. He simply forwards that email back to our Business Process department to approve the list and reset access for another month. Of course he should notify us if any user leaves the employ of his company, so that user authorization can be terminated immediately.

ECMDGears HAS A LOOK AND FEEL FAMILIAR TO USERS OF IPHONE OR IPAD TOUCH SCREENS.

- Notes -

Our sister divisions' wide assortment of products ride on the same ECMD delivery vehicles making deliveries daily that are extremely efficient for everyone involved.
