Product Details

3250 Series Railing provides an attractive solution for both single family and multifamily railing applications that is virtually maintenance free. Railing includes a unique 3 Level T-Shaped Top Rail and is made of a high impact, rigid PVC. 3250 Series Railing offers several adapters to address many applications. Brackets are mounted externally for faster installation and hidden fasteners provide better aesthetics. The 3250 Series meets or exceeds IRC and IBC Building Codes.

Railing Accessories

Designed for the 3250 Series Railing to accent any installation with an added touch of beauty. We offer adapters for round columns, 22° and 45° angles and multiple step angles.
