\* Due to paper and ink variations, the colors as shown in this brochure may vary from actual painted samples. Samples are available upon request.

## 1 Diameter

Common sizes of spiral stairways range from 42" to 72" diameter. A 60" diameter spiral stair meets requirements of many building codes.

## 2 Height

Measure the vertical distance from finished floor to finished floor. The stair is not adjustable.

## 3 Direction of Rotation

Down to the left (*counter-clockwise*)  
Down to the right (*clockwise*)

## 4 Platform Style

Select the configuration that best fits the location of your spiral staircase

\* All stairs are designed to your specifications with a custom formed handrail. The stair is knocked down for easy re-assembly at the jobsite.

**Platform B:** Designed for use in a stairwell. The stairwell is assumed square unless specified round or otherwise. Has railing on one side.

**Platform C:** Designed for attaching to a balcony and has railing on two sides.

**Platform D:** Designed for attaching to a balcony and has a "L" shaped railing on two sides.
