

Sheerline[®]

by  L.B. Plastics, Inc.

Welcome To

In the beginning, our current home of Mooresville N.C. was the perfect location to serve this area's massive furniture manufacturing industry with a sleek PVC drawer slide system. That was forty years ago and L.B. Plastics has since grown to manufacture a number of products to a broad array of business sectors such as telecommunication, aerospace, medical, industrial, building, and transportation.

During those early years, the demand increased for cost effective, maintenance free building products. L.B. developed the Sheerline® brand and innovated several products to address this emerging market. These products have forged the path and evolved into mainstream building solutions being used today. Our complete line of Sheerline® Vinyl Railing, Decking, Fencing, Posts, Column Wraps, and Aluminum Railing are durable, easy to install, and will add beauty to any project.

Along with our network of Sheerline® distribution and dealer partners, L.B. Plastics is a company that strives to maintain our core values, provide a safe work environment for our team members, offer superb quality standards, be a leader in performance driven processes, but most importantly, we are Customer Focused.

1200 Series Aluminum Railing by  L.B. Plastics, Inc.

Adding Elegance & Beauty to Every Home

1200 Series Aluminum Railing

Product Details

1200 Series Aluminum Railing provides an attractive solution for both single family and multifamily applications that is virtually maintenance free and will set your railing project apart. We are proud to offer a product that provides a prestigious textured aesthetic while offering maximum strength and durability.

The 1200 Series offers numerous features and benefits that include four great textured colors with durable AAMA-2604 powder coating. It is code approved for single and multi-family as well as commercial applications (CCRR Code Approval #0223). The 1200 Series includes user friendly brackets that conceal fasteners and swivel stair brackets to address any step angle. Like many of the 1200 Series accessories, the Installation Jig reduces the typical measuring and marking for quicker installations. These products are available with Sheerline's industry leading service and lead times.

Sheerline[®]

Uni-Deck Vinyl Decking

by  L.B. Plastics, Inc.

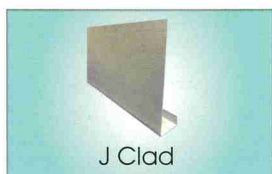

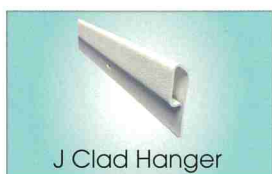

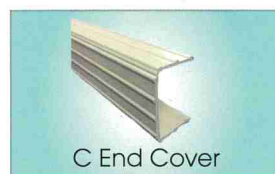

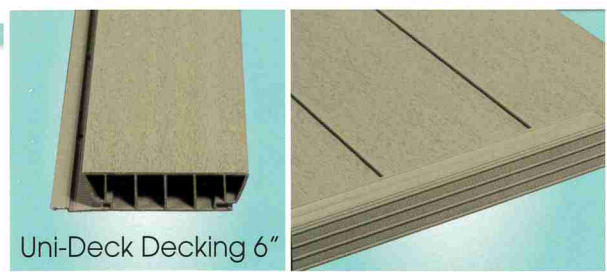

Adding Elegance & Beauty to Every Home

Sheerline® Uni-Deck

As a virtually maintenance-free alternative to wood decking, Uni Deck is a one piece interlocking decking system made from UV stabilized, high impact rigid PVC. Our Uni-Deck system is easier and quicker to install than two-piece systems and includes all the finishing accessories necessary to complete your project.

Available in both a 6" and 12" wide plank, Uni Deck is ideal for decks and docks either new construction or remodeling. Both sizes feature a slip resistant texture but each one has a different pattern offering consumers two options for the finish.

- Hidden fastening screws for a professional finish
- Boards are available in lengths of 12', 16' and 20'
- Select either punched for water drainage or non-punched
- Finish your deck with matching trim

2" x 6" DECKING
